

Date of Training Completion: 18/Feb/2026 - This certificate of completion is valid **five years** from the date of completion

Re: *Concepts in Safety Leadership - Faculty of Engineering*

Dear Jinpeng Zhu,

On behalf of Organizational Development and Health, Safety and Environment, Human Resources, Health, Safety and Environment, congratulations on completing ***Concepts in Safety Leadership - Faculty of Engineering***. The [Culture of Care](#), the University of Alberta safety action plan is based on health and safety as a core value within the university community. Completion of this asynchronous course supports our safety culture and to meet our legal obligations. It is important that you know your role and responsibilities in the protection of the health and safety of workers. This course provides an introduction to worker responsibilities, authorities and accountabilities.

The learning outcomes of the course content and activities:

Recognize and **apply** the following knowledge and skills to engineering environments (in laboratory and field):

- Alberta OHS worker rights and responsibilities
- the three types of safety
- hazard identification, risk assessment and hazard management
- emergency preparedness
- inspections and maintenance
- incident reporting

Completion of ***Concepts in Safety Leadership - Faculty of Engineering*** demonstrates your commitment to collaborate in the creation of a safe physical, psychological and culturally safe workplace where everyone owns their safety performance and that of others so we all go home safely each day. Please keep a copy of this letter to share your accomplishments. We encourage you to apply your training in your workplace and to become a champion for workplace health and safety.

Kind Regards,

Zhengwei Xu
